

eQSuite® “Freezing” Checklist and Troubleshooting

If you are experiencing “freezing” within eQSuite® or tabs that are “grayed out” and not letting you move forward. Typically, this is a result of the web browser being used. If you are using Internet explorer unless you have the most recent updated version, this browser is **NOT** compatible with eQSuite®. We recommend logging out of your current session and try to enter your request with a different browser.

Any of the two most recent versions of:

- ▶ Internet Explorer
- ▶ Google Chrome
- ▶ Mozilla Firefox
- ▶ Safari

Make sure you have Broadband Internet Connection

If you are receiving an error message, please see the How to Guide on how to check for errors. If you need assistance with an error message, please send a screenshot with a description of what is occurring to pr@eqhs.org
