Entering Inpatient requests in eQSuite®

If you are requesting for a prior authorization for an Inpatient procedure

- You will need to click on “Create New Review”
- Provider ID: Should reflect the rendering Hospitals Medicaid ID#
- You will choose the Service type as “Med/Surg”

When entering the procedure in eQSuite® you **cannot** use CPT codes for your request. Any attempts to enter a CPT code will result in the below error message.

You will be required to use ICD 10 PCS Codes (Procedure Coding System). These are inpatient procedure codes that the Hospital uses. eQHealth Solutions, **cannot** provide the codes you should be using. If you are unsure of the correct code, you can contact the scheduling Hospital, or you will need to research and choose the appropriate code for your request. We have listed the below resources to obtain the proper code.

- **ICD 10 Data:**
